DYNAMIC LEADER

Kritarth Raja, MD, AIC Infrastructures Pvt Ltd had to start off early in life due to circumstances. While pursuing his education, Kritarth was interested in infrastructure development and it was this interest and passion that made him take the helm of this business at a very early age. Kritarth and his team was successful in completing the road project of 25 Kms on Mumbai- Nashik Highway in the year 1997-1998 with minimum resources. Kritarth introduced the new technology for preserving the runway surface called "AGSG", used successfully in the United States. The technology was later implemented in India on numerous runway surfaces across the country.

Kritarth has a Diploma in Civil Engineering and comes with an experience of over 19 years. Kritarth and his team have been successful in carrying out the re-carpeting work of the runway at Chhatrapati Shivaji Maharaj International Airport Mumbai-MIAL. It came off well with flying colors and was done within the stipulated 6 hours, maintaining Mumbai's challenging flight schedule.
